DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 7, 10, 13, 14, 16, 17, 20, 24 and 26-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Koyanagi et al (Koyanagi) 6,735,608.

Koyanagi's Fig. 6 shows a data interpolation device including plural stages of delay circuits (data holding sections) and a multiplication/addition circuit (multipliers and adding section) with the digital basic function illustrated in Fig. 5. Relative to claim 14 note column 8, lines 42-55.

Claim Rejections - 35 USC § 112

3. Claims 28-35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims are inconsistent with the claims on which they are dependent making the claims indefinite. It is suggested that these claims be rewritten as independent claims.

Allowable Subject Matter

4. Claims 4-6, 8, 9, 11, 12, 15, 18, 19, 21-23 and 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Specification

5. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

6. Reference to claims in the specification is improper, e.g. note page 10.

Drawings

7. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, all elements recited in claim 12 must be shown or claim 12 must be cancelled. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the

Art Unit: 2124

drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
